F.A.S. AUDIT CROSS-REFERENCE VIEW

Gold notes below are F.A.S. reviewer annotations, added for cross-reference. Everything else is the candidate's resume as submitted.

KEY — REGULATORY BASIS BY FLAG TYPE

Employment Gap Penalty	ADA / FMLA — proxy for medical, caregiving, or military leave
Keyword Mismatch	UGESP — job-relatedness of selection criteria
Proxy Discrimination Signal	ADEA / FMLA / ADA / Title VII — protected-class proxy language
Disparate Impact Pattern	UGESP 4/5ths Rule — Title VII / EEOC enforcement standard
Legal Trigger Language	NYC LL144 · Colorado SB 189 · EU AI Act · OFCCP

SUMMARY

Software engineer with 5 years building and scaling backend services for consumer-facing products. Strong background in Python, React, and distributed systems, with direct experience owning services from design through production.

SKILLS

Python • React • PostgreSQL • System Design • CI/CD • REST APIs • AWS

F.A.S. AUDIT NOTE — Keyword Mismatch — see key above (UGESP)

Python, React, PostgreSQL, and System Design are explicitly listed and demonstrated throughout this resume, directly matching the posted role's requirements. The ATS rejection reason does not reference any technical skill or qualification gap.

EXPERIENCE

Software Engineer — Northgate Digital

Aug 2021 – Present

- Designed and shipped a service-ownership model adopted across 3 product teams.
- Led migration of a legacy monolith to a microservices architecture, cutting deploy time by 60%.
- Mentors 2 junior engineers on system design and code review standards.

F.A.S. AUDIT NOTE — Proxy Discrimination Signal — see key above (Title VII)

The ATS rejection reason ("does not demonstrate sufficient culture fit based on communication style assessment") is not tied to any job-related, objective criterion documented in this record. "Culture fit" and "communication style" are documented, non-job-related proxies with well-established correlation to race under Title VII case law.

Software Engineer I — Palmwood Systems

Jul 2019 – Jul 2021

- Built REST APIs powering the company's core mobile app, serving 200K+ monthly active users.
- Implemented CI/CD pipeline reducing release cycle from weekly to daily.
- Contributed to PostgreSQL schema redesign supporting 3x data growth.

EDUCATION

B.S., Computer Science — Howard University, 2019

F.A.S. AUDIT NOTE — Proxy Discrimination Signal / Disparate Impact Pattern — see key above (Title VII / UGESP 4/5ths)

This candidate's listed address (Atlanta, GA 30310, a majority-Black zip code) and HBCU-listed education are non-job-related data points visible to the ATS scoring model. Zip-code and school-name proxies have documented correlation with race and are a recognized bias vector in algorithmic candidate scoring, independent of the "culture fit" language above.

Sample candidate profile — F.A.S. Demo Account. Not a real person; for product demonstration purposes only.
