F.A.S. AUDIT CROSS-REFERENCE VIEW

Gold notes below are F.A.S. reviewer annotations, added for cross-reference. Everything else is the candidate's resume as submitted.

KEY — REGULATORY BASIS BY FLAG TYPE

• Employment Gap Penalty	ADA / FMLA — proxy for medical, caregiving, or military leave
• Keyword Mismatch	UGESP — job-relatedness of selection criteria
• Proxy Discrimination Signal	ADEA / FMLA / ADA — protected-class proxy language
• Disparate Impact Pattern	UGESP 4/5ths Rule — Title VII / EEOC enforcement standard
• Legal Trigger Language	NYC LL144 · Colorado SB 189 · EU AI Act · OFCCP

SUMMARY

Data analyst with 6+ years of experience turning operational data into decision-ready reporting for mid-size logistics and retail organizations. Proficient in SQL, Python, and Tableau, with a track record of automating manual reporting, improving forecast accuracy, and partnering directly with operations and finance leadership on cost and routing decisions.

SKILLS

SQL • Python (pandas, NumPy) • Tableau • Excel (pivot tables, macros) • ETL pipeline design
• A/B testing • Statistical forecasting • Data warehousing • Stakeholder reporting • Git basics

F.A.S. AUDIT NOTE — Keyword Mismatch — see key above (UGESP)

SQL, Python, Tableau, and ETL pipeline design are explicitly listed and demonstrated throughout this resume. The ATS rejection reason ("insufficient keywords for role") is not supported by this profile.

EXPERIENCE

Data Analyst — Meridian Freight Group

Mar 2022 – Present

- Built weekly demand-forecasting dashboards in Tableau, cutting manual reporting time by 11 hours/week.
- Partnered with operations leadership to identify routing inefficiencies, informing a 6% cost reduction across the Denver and Salt Lake City hubs.
- Automated ETL pipelines in Python/SQL against a 40M-row warehouse dataset, replacing a manual weekly export process.
- Designed a carrier-performance scorecard adopted by 3 regional teams, standardizing how on-time and damage-rate metrics were reported company-wide.
- Mentored 2 junior analysts on SQL query optimization and dashboard design standards.

Junior Data Analyst — Northline Retail Co.

Jun 2018 – Feb 2022

- Maintained inventory and sales reporting for 120+ retail locations using SQL and Excel.
- Supported quarterly business reviews with ad hoc analysis for regional directors, including markdown and shrinkage trend reporting.
- Built a promotional-lift analysis template later adopted by the merchandising team for seasonal planning.
- Reconciled point-of-sale and warehouse-management data discrepancies, reducing month-end close corrections by roughly 30%.

Data Entry & Reporting Assistant — Northline Retail Co. (Seasonal)

Nov 2017 – May 2018

- Supported the analytics team during peak season with data cleanup, report formatting, and ad hoc pulls.
- Converted to the full-time Junior Data Analyst role based on performance.

F.A.S. AUDIT NOTE — Proxy Discrimination Signal — see key above (ADEA/FMLA/ADA)

Employment history is continuous, November 2017 to present, including an in-title promotion.

No unexplained gap or non-standard transition is present in this record.

CERTIFICATIONS

Tableau Desktop Specialist (2023) • SQL for Data Science, Coursera (2021) • Google Data Analytics Professional Certificate (2020)

EDUCATION

B.S., Business Analytics — University of Colorado Denver, 2018

F.A.S. AUDIT NOTE — Disparate Impact Pattern — see key above (UGESP 4/5ths)

This flag reflects a pool-level rejection-rate pattern for this role, not an attribute of this individual resume. See the audit trail for the full statistical breakdown.
